

Dear Sirs, It has come to my attention that the NAB is trying to limit the services that XM Radio is providing to listeners like myself. I would like to tell you that XM Radio, in my opinion, is the greatest thing since Radio was invented. I am a salesman on the road and I cover 4 states. I have spent my whole adult life having to listen to programs only to lose the signal and not be able to hear a whole song or get the end of a presentation being offered on public radio just to mention a few. I do not want to see a reduction in XM Radio offerings but rather an increase in their services. XM Radio is truly the closest thing we as a nation have to a true national radio broadcasting system. Thank you for your consideration in this matter and please tell the NAB to back off. Sincerely Yours,
Mike Boone
